# ONE WORLD

**ONE

COLLECTION

**DE** Weil wir rund 90 Prozent unserer Lebenszeit in Gebäuden verbringen, beeinflussen Innenräume wesentlich unsere Gesundheit und unser Wohlbefinden. Baubiologisch unbedenkliche Baustoffe und eine gute Raumluft sind aus diesem Grund ebenso essenziell wie viel Tageslicht und der unmittelbare Kontakt zur Natur. Zeitgemäße Architekturkonzepte müssen zudem in besonderem Masse die Bedürfnisse der Nutzer berücksichtigen und für gleichermaßen funktionale wie ästhetische Umgebungen sorgen. Die Produkte von SWISS KRONO AG bestehen aus Holz – das ein wohngesundes, individuelles Bauen ermöglicht und damit in der Lage ist, ein Optimum an Lebensqualität zu bieten.

**EN** Because we spend around 90 percent of our life in buildings, interior spaces have an essential impact on our health and our well-being. This is the reason why ecologically safe materials and a good room climate are just as important as natural daylight and close contact with nature. What's more, modern architectural concepts must account for users' needs to a high degree, and for the functionality as well as aesthetics of the surroundings in equal measure. The products from SWISS KRONO AG are made of wood – which allows for healthy living spaces and unique building options, and that is able to offer an optimum quality of life.

**FR** Puisque nous passons environ 90 % de notre vie en intérieur, ces espaces agissent de manière essentielle sur notre santé et notre bien-être. C'est la raison pour laquelle des matériaux sains sur le plan écologique et un air ambiant de qualité sont tout aussi importants que la lumière naturelle et la proximité de la nature. Les concepts architecturaux modernes doivent en outre prendre en compte les besoins des utilisateurs au plus haut degré ; tout autant que la fonctionnalité et l'esthétique de ce qui les entoure. Les produits de SWISS KRONO AG sont en bois, ce qui permet de créer des espaces de vie sains et qui offre des possibilités conceptuelles uniques ainsi qu'une vie optimale.

**IT** Poiché trascorriamo circa il 90 per cento della nostra vita all'interno di edifici, questi spazi influiscono in misura significativa sulla nostra salute e sul nostro benessere. Per tale motivo, l'utilizzo di materiali da costruzione sani ed ecologici e una buona qualità dell'aria interna sono essenziali quanto un'abbondante esposizione alla luce diurna e il contatto diretto con la natura. Per essere adeguati ai tempi, i progetti architettonici devono inoltre tenere conto delle esigenze delle persone e creare ambienti tanto funzionali quanto gradevoli sul piano estetico. I prodotti SWISS KRONO AG sono realizzati in legno, un materiale che consente di costruire spazi personalizzati e salutari per una qualità della vita ottimale.

**DE** Wir verbringen den Grossteil unseres Lebens in Gebäuden. Wir atmen Raumluft, werden von der Raumatmosphäre seelisch beeinflusst und stehen in Berührung mit Ausbaumaterialien. Bei der SWISS KRONO AG Initiative «CH80» stammen entlang der gesamten Wertschöpfungskette rund 80% der Rohstoffe aus der Schweiz und mindestens 80% der Wertschöpfung verbleiben in der Schweiz. Unsere Produkte aus Menznau sind damit «Swiss made». Wir produzieren nicht nur in der Schweiz, sondern fördern auch die Durchforstung und Verjüngung von Schweizer Wäldern, unterstützen das hiesige Gewerbe sowie hiesige verarbeitende Betriebe und vermeiden unnötig lange Transportwege. Durch unsere Produktionsprozesse sind wir schon heute in der Lage, 90% der eingesetzten thermischen Energie aus erneuerbaren Quellen klimaneutral herzustellen. Ein Gewinn für Mensch und Natur.

**EN** We spend most of our life in buildings. We breathe in-door air, are psychologically influenced by the room's atmosphere and come into contact with finishing materials. With SWISS KRONO AG Initiative "CH80", around 80 % of the raw materials along the entire value creation chain originates in Switzerland and at least 80 % of value creation remains in Switzerland. Our products from Menznau are therefore "Swiss-made". We not only produce in Switzerland, but also promote the thinning and rejuvenation of Swiss forests, support local trade and local processing companies, and avoid unnecessarily long transport routes. Thanks to our production processes, we are already in a position to produce 90 % of thermal energy used from renewable sources climate-neutrally. A win/win for mankind and nature.

**FR** Nous passons la majeure partie de notre vie dans des bâtiments. Nous en respirons l'air ambiant, sommes influencés par leur atmosphère et en contact permanent avec les matériaux de construction employés. Avec l'initiative « CH80 » de SWISS KRONO AG, 80 % des matériaux employés dans toute la chaîne de création de valeur proviennent de Suisse et au minimum 80 % de la valeur ajoutée reste en Suisse. Nos produits de Menznau sont donc certifiés « Swiss made ». Et non contents de produire en Suisse, nous soutenons également l'éclaircissement et le rajeunissement des forêts suisses, promouvons l'industrie et les entreprises de transformation locales, tout en évitant les longs transports. Grâce à notre processus de production, nous sommes aujourd'hui déjà capables de produire 90 % de l'énergie thermique utilisée à partir de sources renouvelables et d'assurer notre neutralité climatique. Un atout pour l'homme et la nature.

**IT** Trascorriamo la maggior parte della nostra vita all'interno di edifici. Respiriamo aria indoor, siamo influenzati psicologicamente dall'atmosfera degli ambienti chiusi e veniamo a contatto con i materiali da costruzione. Nell'ambito della SWISS KRONO AG Initiative «CH80», lungo tutta la catena del valore aggiunto circa 80 % delle materie prime proviene dalla Svizzera e almeno 80 % della produzione rimane nel paese. I nostri prodotti di Menznau sono quindi «Swiss made». Oltre a produrre in Svizzera, contribuiamo a tenere pulite e a rigenerare le foreste del paese, supportiamo le attività e le aziende di trasformazione locali, ed evitiamo percorsi di trasporto inutilmente lunghi. Grazie ai nostri processi di produzione già oggi siamo in grado di ottenere da fonti rinnovabili il 90 % dell'energia termica impiegata, con un impatto neutro sul clima. Un guadagno per l'umanità e per la natura.

**DE** Oft schränkt die Anforderung «schwer entflammbar» die Materialwahl ein. SWISSCDF entspricht dieser Brandklassifizierung nach EN 13501-1 und lässt dadurch die Anwendungsvielfalt wachsen.

**FR** Bien souvent, le critère «difficilement inflammable» restreint le choix de matériaux. SWISSCDF est conforme à ce classement au feu conformément à la norme EN 13501-1 et permet ainsi d'accroître la diversité d'applications.

**IT** Molto spesso il vincolo del requisito «difficilmente infiammabile» limita la scelta del materiale. SWISSCDF, ottemperando all'obbligo di questo requisito ai sensi della norma EN 13501-1, permette di ampliare a dismisura la gamma delle possibili applicazioni.

**EN** A fire retardant requirement often limits the choice of materials. SWISSCDF meets the requirements according to EN 13501-1 which increases its range of use vastly.

# Processing

## DE Verarbeitung

Zur Verbindung können herkömmliche Schraub-, Klebe- und Leimtechniken angewendet werden. Der Werkstoff kann zudem ohne füllern und Zwischenschliff lackiert werden. Wir empfehlen ihnen hierzu die Broschüre «Empfehlung für die mechanische Bearbeitung», erstellt in Zusammenarbeit mit LEUCO.

Bestellen Sie die Broschüre unter:

[www.swisskrono.ch/service](http://www.swisskrono.ch/service)

## FR Usinage

La jonction peut se faire avec les méthodes de vissage et de collage conventionnelles. Le matériau peut par ailleurs être verni sans remplissage ni ponçage intermédiaire. Nous recommandons à cet effet la brochure «Recommandation pour l'usinage mécanique» rédigée en coopération avec LEUCO.

Commandez la brochure sur

[www.swisskrono.ch/fr/service](http://www.swisskrono.ch/fr/service)

## IT Lavorazione

Per il collegamento possono essere impiegate le comuni tecniche di avvitamento, incollaggio e laminazione. Il materiale inoltre può essere verniciato senza additivi e levigatura intermedia. Vi raccomandiamo a tal proposito di consultare il nostro opuscolo «Raccomandazioni per la lavorazione meccanica», redatto in collaborazione con LEUCO.

Potete ordinare l'opuscolo al seguente indirizzo:

[www.swisskrono.ch/it/servizio](http://www.swisskrono.ch/it/servizio)

## EN Processing

For connection purposes, conventional screws, bondings and adhesive techniques can be used. The material can also be varnished without the need for fillers or intermediate sanding. In this context, we recommend the «Recommendation for Mechanical Processing» brochure that was created in collaboration with LEUCO.
